

- KEY TO MAPS USED IN  
COMPILATION
1. Capps, S. R., 1919, U. S. Geol.  
Survey Bull. 687, pl. 2, scale  
1:250,000.
  2. Capps, S. R., 1927, U. S. Geol.  
Survey Bull. 792, pl. 2; scale  
1:506,880.
  3. Capps, S. R., 1940, U. S. Geol.  
Survey Bull. 907, pl. 2, scale  
1:250,000.
  4. Ekblom, M., 1918, U. S. Geol.  
Survey Bull. 667, pl. 2, scale  
1:250,000.
  5. Reed, J. C., 1933, U. S. Geol. Survey  
Bull. 849, pl. 2, scale 1:62,500.
  6. Wahrhaftig, Clyde, unpublished  
photogeologic map in files of  
U. S. Geol. Survey, scale  
1:144,000.
  7. Wells, F. G., 1933, U. S. Geol.  
Survey Bull. 849, pl. 28, scale  
1:62,500.
  8. Whitte, D. E., 1942, U. S. Geol.  
Survey Bull. 849, pl. 49, scale  
1:316,880 (approx.).
  9. Geology compiled by photo-  
geologic methods.

- |  | MINES AND PROSPECTS  |
|--|--|
| <p>↑</p> <p>Strike of vertical beds</p> <p><i>Based on photointerpretation</i></p>     | <p>✕</p> <p>Gold placer</p>  |
| <p>52</p> <p>Strike and dip of foliation</p> <p><i>Based on field observations</i></p> | <p>■</p> <p>Gold-silver lode</p>   |
| <p>52</p> <p>Strike and dip of joints</p> <p><i>Based on photointerpretation</i></p>   | <p>◇</p> <p>Antimony mine</p>  |
| <p>+</p> <p>Strike of vertical joints</p> <p><i>Based on photointerpretation</i></p>   | <p>◇</p> <p>Antimony prospect</p>  |
| <p>+</p> <p>Strike of vertical joints</p> <p><i>Based on photointerpretation</i></p>   | <p>○</p> <p>Zinc-lead prospect</p>   |
| <p>▲</p> <p>Eratrite boulder</p>   | <p>Chief ore minerals <i>sphalerite and galena with some chalcopyrite</i></p>  |
| <p>ERRATIC</p> <p>Conspicuous end moraine or ice-contact deposit</p>                   | <p>△</p> <p>Mixed sulphide prospect</p> <p>Chief ore minerals <i>pyrrhotite and sphalerite with some chalcopyrite, pyrite, and</i></p> |
